

### **What motivates you at school ?**

My name is George and I study at LPO Nord Caraïbe. That's my first/second year at this establishment which is a comprehensive and vocational school.

I enjoy this school because it is a social place where I can meet people from different background and make new friends.

I am an only child so the school is my second home. I spend most of my time at the school.

I like the school for another reason. This is a place where I learn a lot and acquire knowledge in different fields. My favorite subjects are history and languages. History helps me know about how societies were built. I also like languages because I plan to travel a lot when I am older. So, I am motivated by knowledge, meeting people but I am also aware of the fact that schools broaden our minds and make us more mature. It prepares us for a more independent life.
