

Film Review.

Twilight, chapter 2 – New Moon

The second part of the saga is the most movie expected of the year. New moon has been a big success with around 970 000 entries : it precedes 2012 ! However, opinion is divided : for some people, the main character, Bella, is passive, disappointing, she doesn't feel like doing anything.. The film has been, for them, devoid of interest. It has just been a disappointment. But fortunately, this movie has brought great pleasure to a few persons. Indeed, the suspense has lasted throughout the film and it has been full of emotions ! There are some moments which have viewers breathless and some scenes have been really amusing.

New moon, taken from Stephanie Meyer's novel, has been able to conquer people's heart like the first part. The director, Chris Weitz, and his crew made a very nice work.

I can't wait for the sequel of the film !

2012

Thrill seekers watch out, because this movie is filled with special effects and realism is present , you will shiver in front of the screen ! The film is really well-made : It made me shudder. You must know that the Mayan Calendar predicted that the apocalypse will take place in 2012. It succeeded in making me scared because if the end of the world will happen as the movie showed, it's really worrying. I think that this movie will make your flesh creep ; you will feel tense throughout the movie. I am convinced that it will keep you in suspense, you won't manage to foresee the end. Moreover you won't be disappointed because 2012, directed by Roland Emmerich, has been a blockbuster since they made a worldwide box office of \$461,371,032 and it isn't over yet !
