

The document is a video about a young Chinese girl who studies at Blue Mountains Hospitality School in Australia.

There are at least two aspects of Kayla's life.

First of all, she introduces herself, speaks about her motivations. Then, she passes on her student's life at the campus.

She explains that she decided to go and study in Australia after some members of the school came at her establishment when she was younger. They advertised their school and they convinced her to pursue her study in Australia. Actually, Kayla can speak Chinese and English so she didn't have problems of communication. However, the courses help her overcome her shyness and develop her communication skills.

It's worth mentioning that the school is equipped with 3 restaurants (fast-paced buffet style restaurant, a fine dining restaurant and an a la carte style restaurant) a front office and a housekeeping sector. These facilities help the students practise their professional skills. What is quite certain is that Kayla likes the environment. She speaks highly / praises/ highlights/ emphasizes the beauty of the countryside and the people's kindness. It is quite true that the campus is small and everybody knows each other.

In short, Kayla is encouraging us to come and study at Blue Mountains Hospitality School. It is a small unit. You are not far from the cities. If you want to move to Sydney, you can take the train. Kayla's school looks like Bellefontaine high-school. Here, we have Bellefontaine and Case-Pilote. We need to take the bus to go to the capital city, Fort-de-France. We also have the same kinds of equipments. However, it's worth mentioning that she doesn't speak so much about her motivations to start a career in hospitality.
