Mr Donald TRUMP
White House
Washington, DC 20500

Dear Mr Donald TRUMP,

I write to you this letter to give you my opinion about immigration because I don't agree with yours. Above all, I'm going to remind you the definition of globalization. It is the process of international integration from the interchange of world's products, ideas and people on the earth. Our country is one of the most important world powers. It makes sense that we are the country which receives a lot of migrants. To my mind immigration and mobilities are not a danger for the US. To convince you I will show you to that extent immigration is an asset for the US.

In fact, globalization is an important component of the economy of the US. Nowadays, there are a lot of Hispanics in Miami. This is because of Castro's dictatorship which involves thousands of Cubans. According to the conjectures there will be 50% of Hispanics in the country. Many of them have jobs and help to improve the wealth of the US. The nickname of Miami, « Little Habana » shows the significant presence of Cubans. Further, another city highlights migrants' presence in the US, it is the case for « Little Italy » in New York. It is true that the situation of a fast food in Miami is problematic. It means that the fact there is only Spanish who do not speak English in the restaurant. So it is complicated to communicate with the staff. I think that the government must help people to speak English. So, these immigrants are very present in our country.

Now, I would like to show you that these immigrants make our country successful. For this, I will take two examples of figures. Oprah Winfrey, and Andrew Carnegie. The last one arrived in the USA in an immigrant ship worked as a bobbin boy in a textile factory. He was poor and did not refrain to accept menial jobs. He earns 2,50\$ a week. Whenever he had a dollar he invested it. Subsequently he became very rich and gave millions for peace. He helped to improve the US situation and has invested in science for our country. In this case an immigrant helped our country. Oprah Winfrey is an afro-american who

was born in the 50's. She suffered from segregation. She became very famous and created the Oprah Winfrey Show, a magazine, O for Oprah. Thanks to her talent in communication she touched people worldwide. She contributes to Obama's elections in some extent. She became one of the 20th century in Time Magazine. In this way, Oprah, helped to improve the influence of the US.

Furthermore, the combination of English culture and Spanish culture seems to be positive. This created the Spanglish. It is a mix of two languages. New words are created like « chopear » or « googlear ». So the immigrants are a growing-part of the country.

For all these reasons, I hope that I change your opinion about the migrant question, Mr President. To my mind, we have to welcome the migrants because they are already an important presence in our country. So close borders and stop migrants arrival this is a negative thing. We must accept them.

Sincerely.
